

Capability Presentation

Established in 2013, ES2 is a dynamic Australian based service provider with its Head Office in Perth, and national offices in Brisbane and Melbourne. ES2 specialises in Enterprise Security, Solutions and Cloud Services. Our mission is to be a trusted advisor of business centric services and solutions.

Our guiding principle is to become our client's trusted advisor as well as being their preferred provider of solutions and services.

Our proactive and flexible delivery approach has generated a loyal client based within the public and private sectors, where service is paramount and the 'Client is King'.

We are your trusted advisor!

Enterprise Security

ES2 focusses on empowering businesses and organisations with the knowledge and tools required to Identify, Detect, Respond, Recover and Protect from today's Cyber Threats and Attackers.

ES2 have extensive experience in assessing the security of our clients, their people, networks, applications and services for weaknesses, and can quickly provide trusted remediation advice with additional assistance from our experienced solutions team.

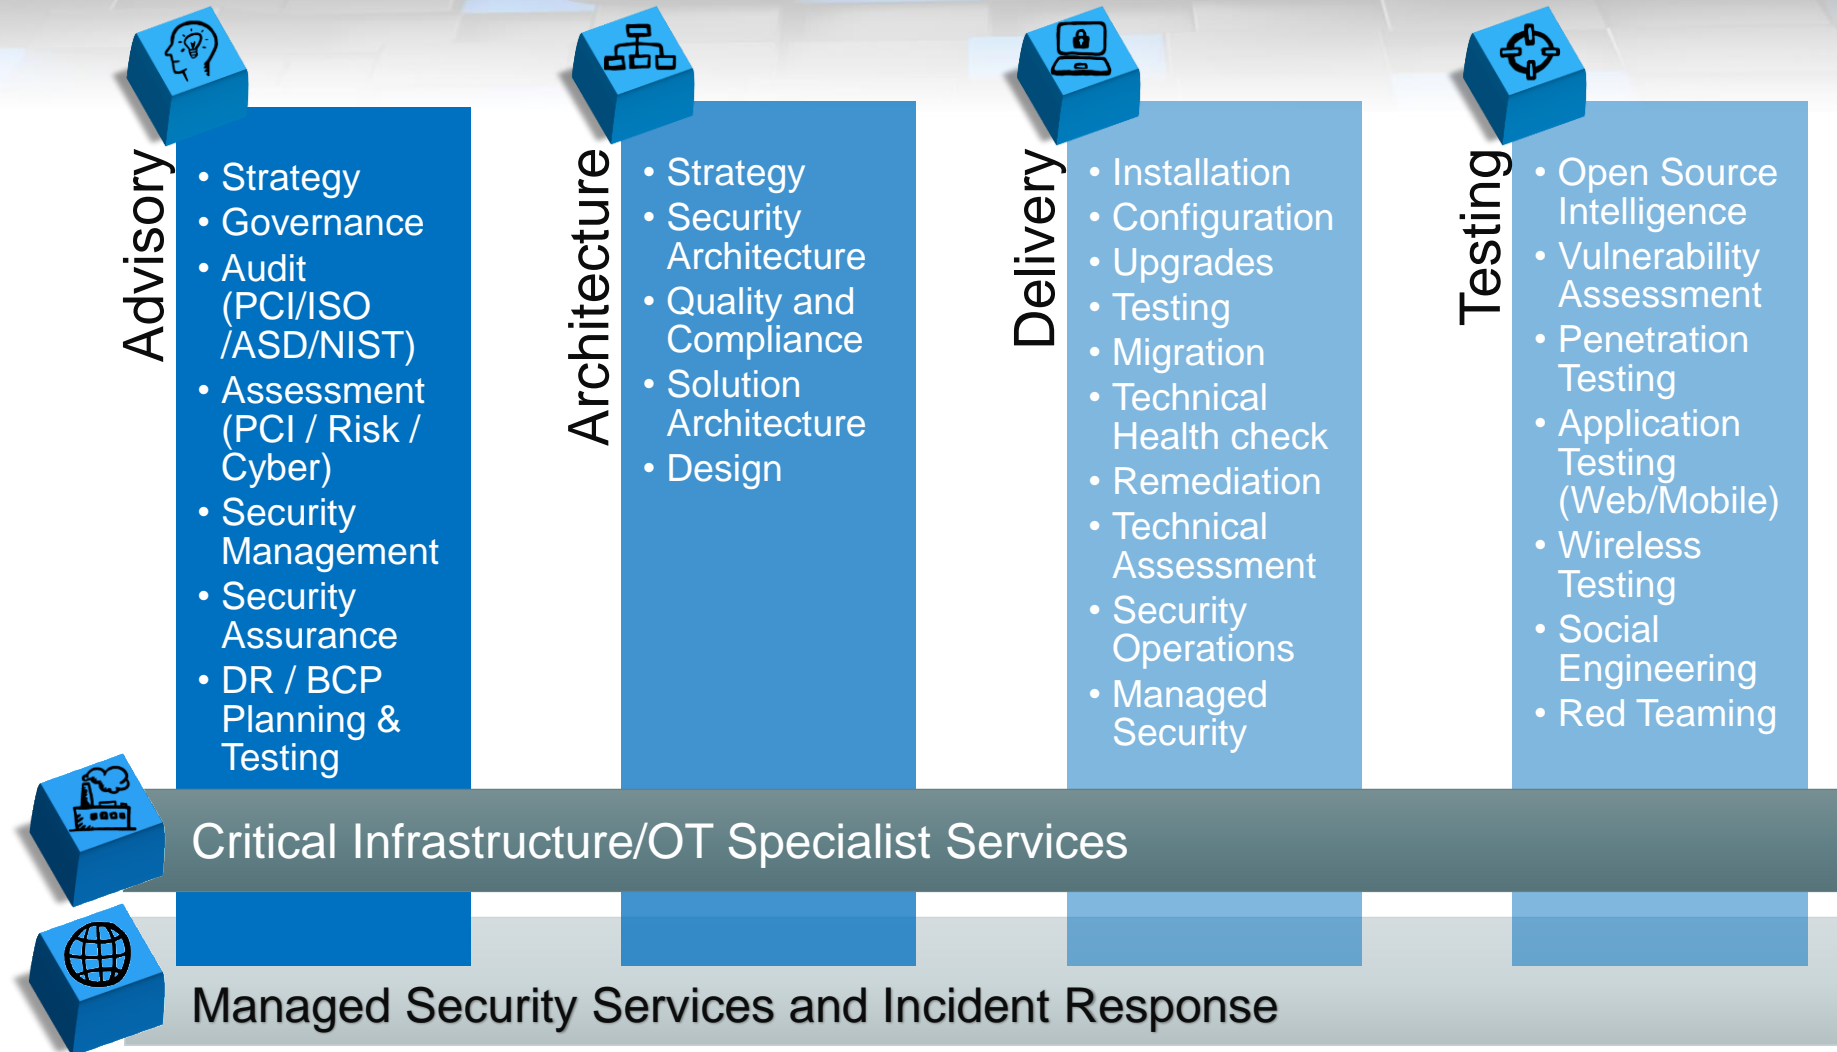

Our strengths are in Auditing, Assuring, Architecting and Implementing the IT security controls that your business needs to protect your valuable information assets whilst safeguarding your users, and customers.

Our team has the skills and local experience to audit and assess the risks faced by our clients' IT systems and processes to ensure they meet business requirements and align to recognised Security Standards (ISO/ASD/PCI/NIST)

Our Enterprise Security Team as your trusted security advisors are able to increase your security maturity through the identification of security strengths and potential weaknesses with 'end-to-end' business centric consulting and solutions and are always ready to respond should an Incident occur.

Security Services

Enterprise Solutions

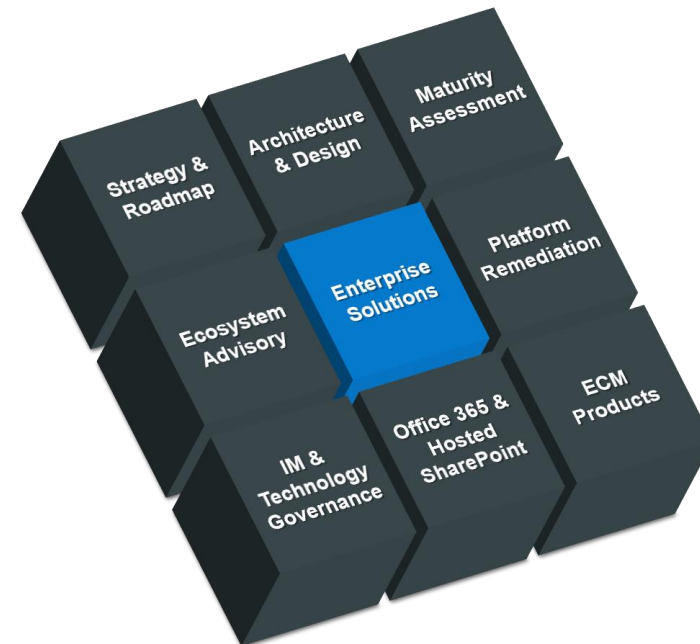

ES2 focusses on assisting businesses and organisations with deploying and evolving their Data Architecture, Business Intelligence and SharePoint platform.

The phenomenal uptake of web applications supporting information management, collaboration and productivity systems have introduced many challenges to information, business and technology managers.

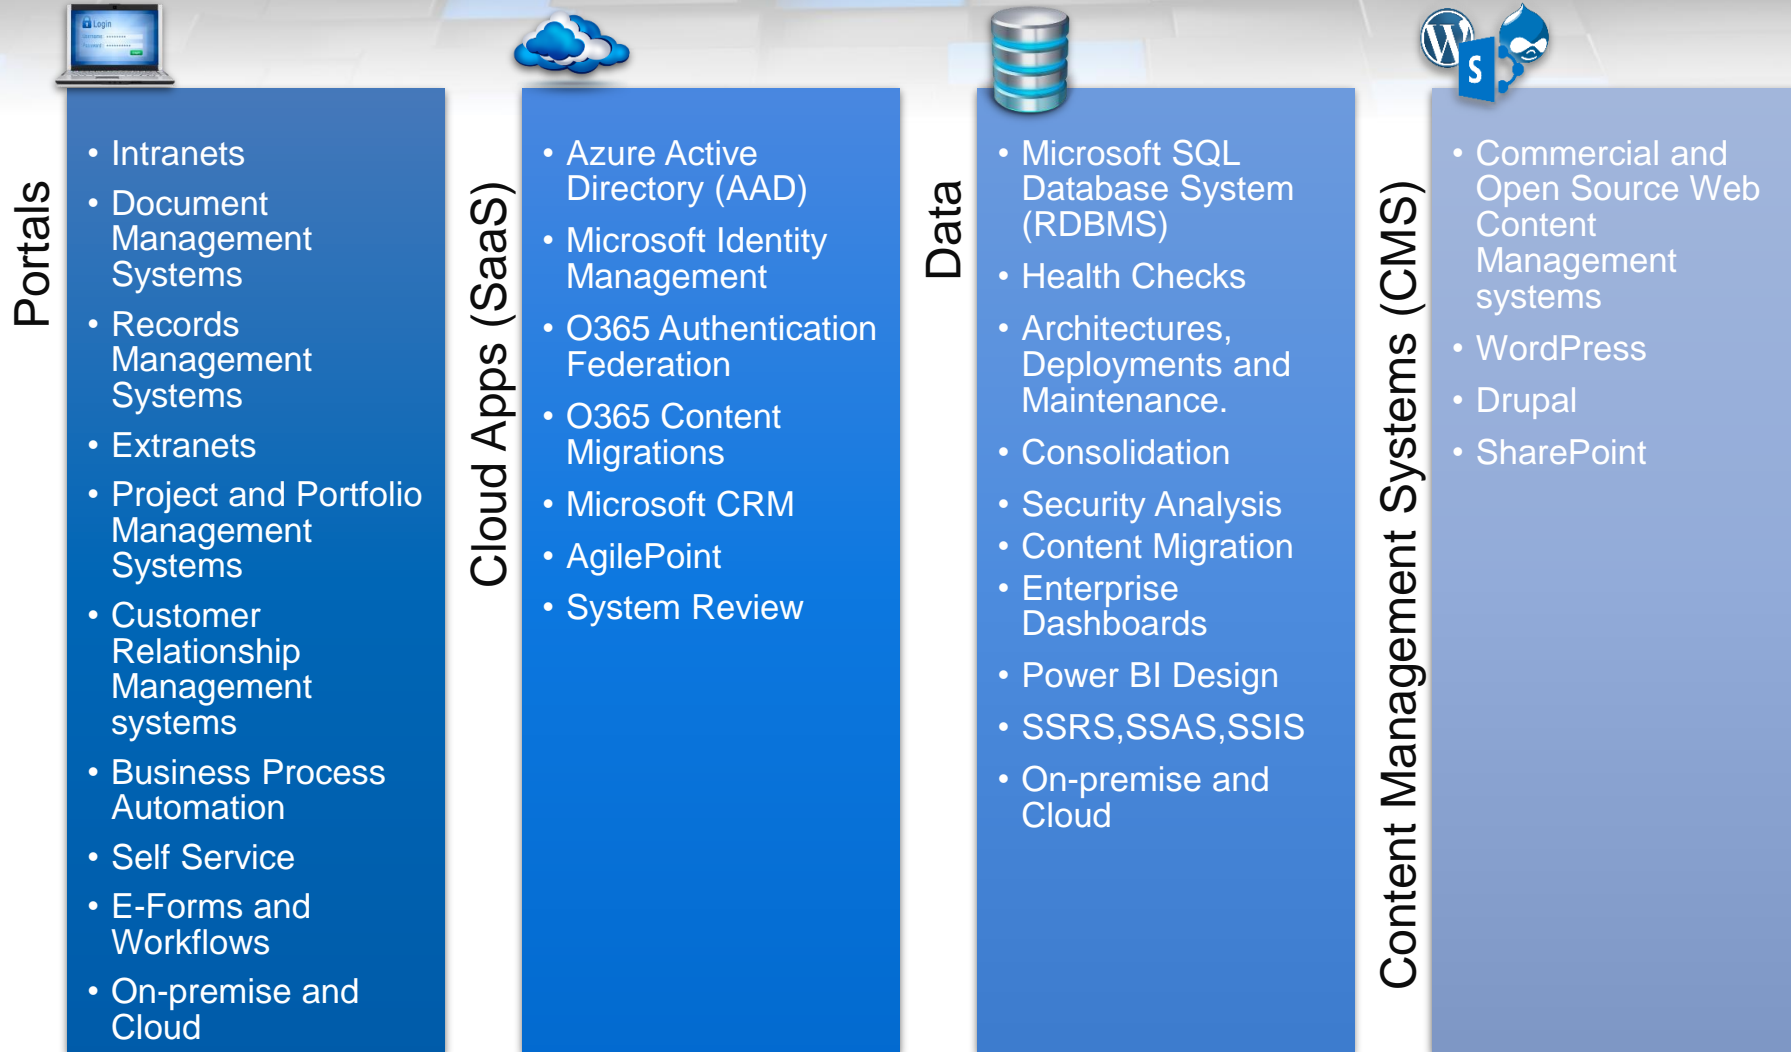

Our strength in designing, building, deploying and maintaining these solutions and systems help business to scale and deliver these applications rapidly and reliably to their users.

Our team has the skills and local experience to deliver high quality, value for money solutions that meet business requirements.

Our Enterprise Solutions team focuses on platform governance and change management to mitigate business impact.

Solutions Services

Enterprise Cloud Services

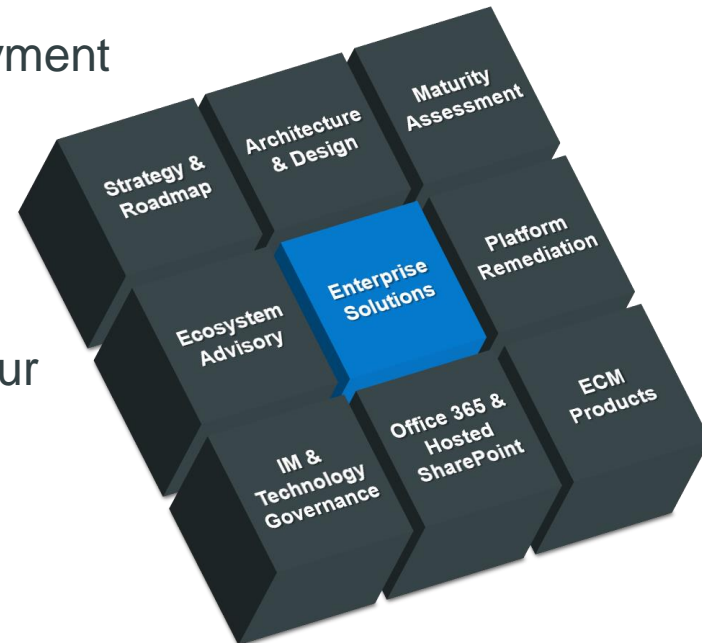

We are forging a strong new relationship with AWS as our preferred cloud platform vendor. With our pedigree in security and solutions, we are uniquely positioned in the market to deliver AWS services with the control, governance and security that customers need for running production workloads in the cloud.

Whether simply migrating your technical legacy, modernising your applications, or building new, business focused applications, ES2 has the deep skills and experience to assist you on your journey.

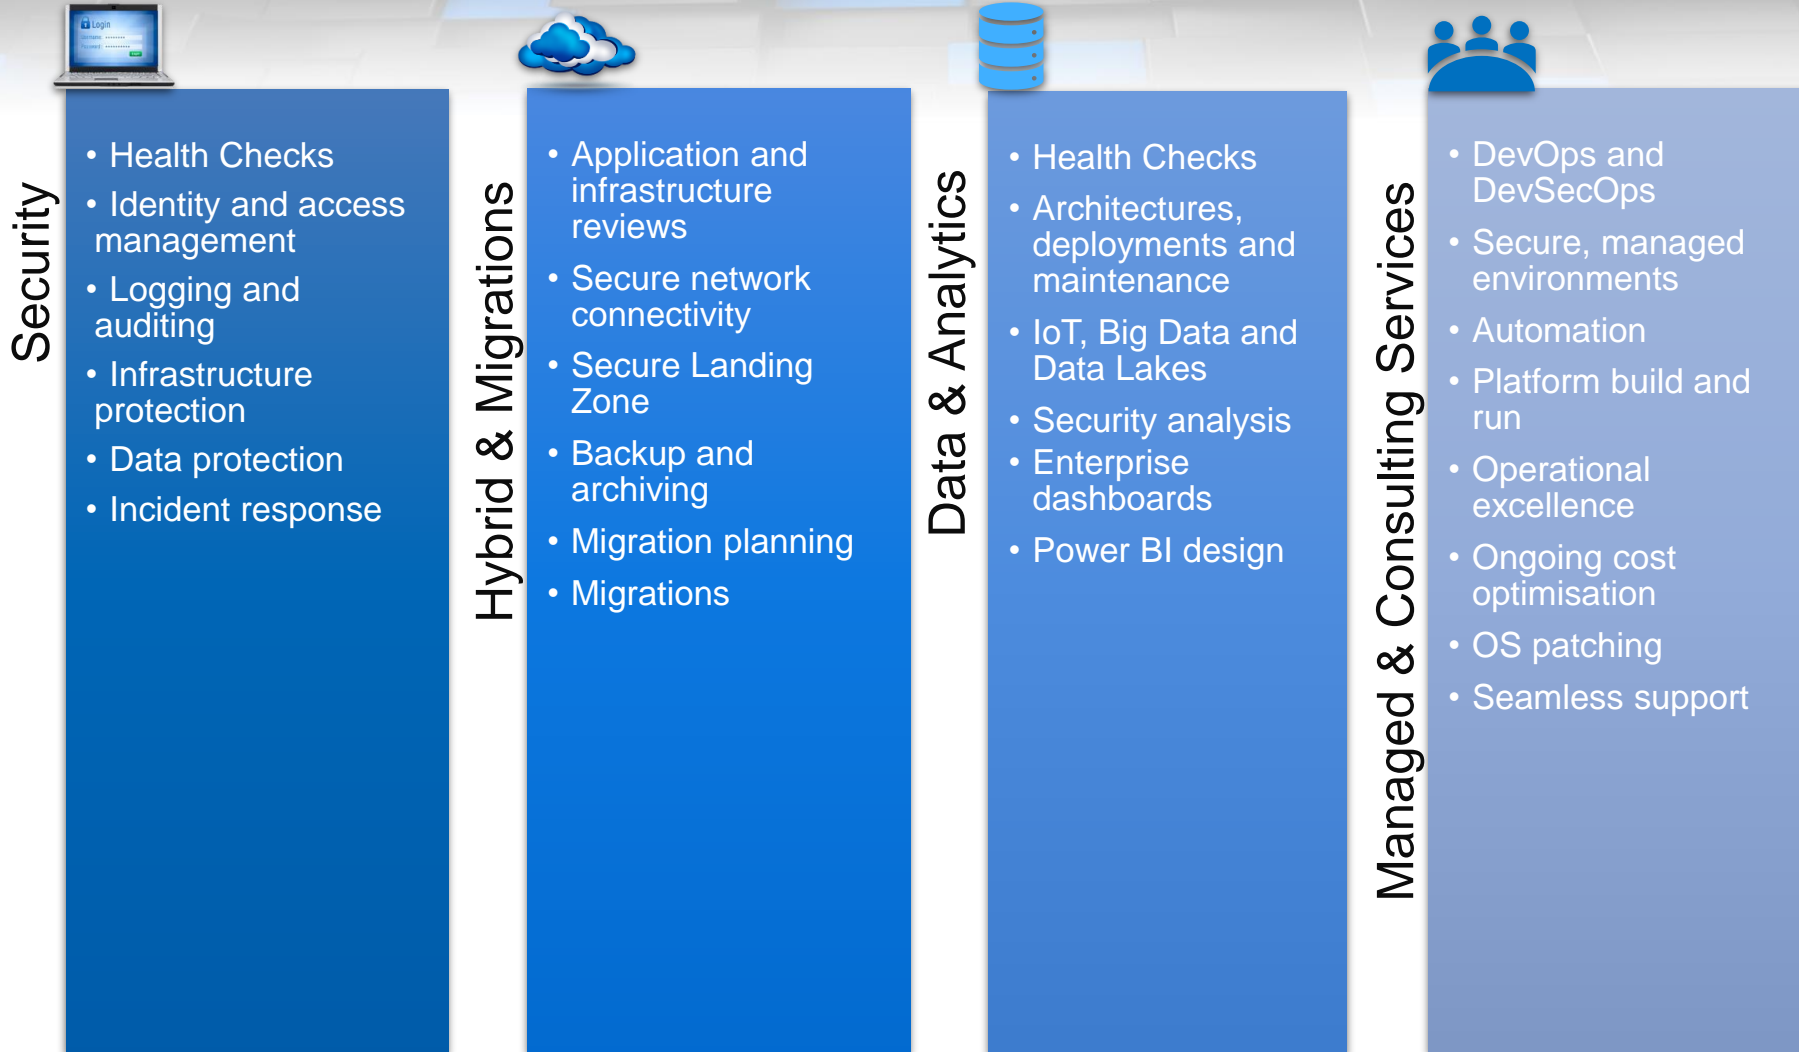

We tightly follow the best practices laid down by AWS in their partner program to help you establish a Well-Architected foundation that will scale with your needs.

Additional ES2 partnerships add further value to your AWS deployment whether that be in security, application management, backups or any other requirement for holistic delivery of your infrastructure.

Our Managed Services capability naturally extends to your cloud environment delivering 24x7 Security Monitoring and Support for complete peace of mind, allowing you to focus more energy on your business objectives.

Cloud Services

Consulting Services

The ES2 leadership team is made up of experienced CIO's, Heads of Departments and Managers from all types of industries from Resources and Finance to Government and Military.

ES2 provides Consulting and Advisory Services to help large and small organisations achieve their Business objectives.

ES2 Consulting and Advisory Services include:

- Strategy
- Testing
- Governance Risk and Compliance
- Change Management
- Project and Program Management
- Business Analysis and Process assessment.

A training strategy involves the systematic training and improvement of people within the organisation so that they, and the company, can achieve their objectives and both personal and corporate goals.

A training program allows you to strengthen those skills that each employee needs to improve. A development program brings all employees to a higher level so they all have similar skills and knowledge.

ES2 design, develop and deliver learning solutions from customised training to certified programs to meet our client's needs.

ES2 know the true power of training and can match these requirements no matter what the scale.
